Technical Project Manager & Scrum Master | CSM®

PROFESSIONAL SUMMARY

Technical Project Manager and Certified ScrumMaster with 7+ years across software engineering and delivery, including 4 years at Amazon leading cross-functional programs on AWS-based distributed systems and 35+ sprints as rotating Scrum Master. Drives milestones, dependencies, risk mitigation and launch readiness, backed by hands-on engineering depth in microservices, APIs, databases and system architecture.

CORE COMPETENCIES

Project Delivery: Project Planning · Milestones & Timelines · Risk & Issue Mitigation · Dependencies · Scope & Change Control (ITIL) · Release Management · Status Reporting · Technical Debt Reduction · Stakeholder Communication · Process Improvement

Agile & Scrum: Scrum · SDLC · Sprint Planning · Backlog Grooming & Prioritization · Story Point Estimation (Planning Poker) · Capacity Planning · Agile Metrics (Velocity, Burndown) · Conflict Resolution

Technical: AWS Cloud · Identity & Access Management (IAM) · Microservices · REST APIs · System Architecture · Docker & Amazon ECS (Containerized Deployments) · DynamoDB · SQL · Java · Python · CI/CD · CloudWatch

Tools: Jira · Azure DevOps · Microsoft 365 (Excel, PowerPoint, Word, Teams, SharePoint) · MS Project · GitHub · GitLab · Smartsheet · AI Productivity Tools (Claude)

WORK EXPERIENCE

Amazon — **Bellevue, WA**
Software Development Engineer (Scrum Master) — Feb 2022 – Apr 2026

- **52% faster processing and 30% higher cluster utilization** from the cross-functional Speed Inference modernization, by managing scope, milestones, risks and dependencies across engineering, analytics and product.
- **Zero production regressions** on the cross-functional Dynamic Turn Costs v4 launch, by owning the timeline, dependencies, launch readiness and risk mitigation.
- **Owned routing speed, reliability and On-Time Delivery KPIs** across Last Mile regions, partnering with Product, Ops and Analytics to define requirements and validate improvements with KPI data.
- **Led 35+ two-week sprints** as rotating Scrum Master for a 6-engineer team, tracking velocity and burndown in Jira dashboards and sending weekly status updates on progress, risks and blockers to leadership.
- **Sustained 83%+ sprint completion rate** by right-sizing commitments: breaking epics into stories and spikes, facilitating story-point estimation and running capacity planning.
- **Change-management prep cut 86%, from 5.5 hours to 45 minutes**, with a standardized MCM template adopted by the team and by program and engineering managers requesting releases.
- **70% improvement in Tier-1 reliability** by redesigning the startup system architecture to a push-based DynamoDB model with IAM-restricted writes and CloudWatch monitoring.
- **92% less manual effort and improved SLA adherence** on SPS dial workflows, by implementing IAM-based API controls meeting security and compliance standards.
- **$160K a year saved** and technical debt reduced by leading the global deprecation of the STC routing model; **$27K a month saved** by automating simulation environments.
- Mentored a junior engineer and an intern to deliver independent projects **within 90 days**.

University of Cincinnati — **Cincinnati, OH**
Student Software Developer — Feb 2021 – Feb 2022

- **7,500+ medical staff** adopted a React decision-support app turning clinical guidelines into workflows; drove rollout through clinician demos, staff training and user documentation.

Tata Consultancy Services — Client: Daimler Truck North America — **India**
System Engineer — Sep 2018 – Jan 2021

- **60% more stable releases** for Daimler Truck's regulated warranty platform, through scope control, security scanning, code-quality gates and incident response, with work and releases tracked in Azure DevOps.
- **40% faster response times** after re-architecting a monolith into Spring Boot microservices and optimizing 25,000+ business rules.
- Integrated **15,000+ business rules** into a scalable claims platform across distributed onshore and offshore teams.

EDUCATION & CERTIFICATIONS

Certified ScrumMaster (CSM®) — Scrum Alliance — 2026
Project Management Professional (PMP) — Project Management Institute — In progress
M.S., Computer Science — University of Cincinnati — 2022
B.S., Information Technology — Savitribai Phule Pune University — 2018
